

Retalix StorePoint Web Office

STORE & SALES CHANNEL SUITE

KEY BENEFITS

- Seamlessly integrates key back-office functions
- Provides unparalleled security 24/7
- Delivers easy-to-view transaction data in real time
- Offers unprecedented installation speeds
- Allows quick addition of stations and users
- Restricts users to management-approved content
- Lowers investment and operational costs

Managing the back office effectively has always been a major challenge for convenience retailers. The need to integrate cash, inventory, merchandising, fuel and other C-Store operations into a seamless back-office system has been a daunting—and sometimes profit-draining—task.

But with Retalix StorePoint Web Office, all it takes is an Internet connection. Designed specifically for C-Store environments, StorePoint Web Office is an easy-to-use Internet-based back-office management solution. Now you can view all of your most important data at a glance—store by store, detail by detail, day by day.

Why worry about backup, viruses, security, reliability, limited time constraints or other back-office concerns? StorePoint Web Office is just a click away, anytime and anywhere.

PRODUCT HIGHLIGHTS

.net Microsoft SQL server

Compatible with all major online accounting systems

Daily RAID1 backup on and off site

Data exportable to Excel for activity reports and analysis

Change items highlighted in red for easy tracking

User information access limited by management

Viewable transaction data (sales, summaries, charges)

Comprehensive fuel management capabilities

Online support and customized, travel-free training options

Installation times as fast as 24 hours—including price book

MORE CONVENIENCE, MORE SECURITY.

Retalix StorePoint Web Office uses the latest Microsoft .net technology to manage all of your key back-office functions via cloud and virtual servers. A secure and reliable solution with no hardware to worry about, StorePoint Web Office allows you to operate stations from anywhere in the world. Data is stored centrally, backed up daily both on and off site, and manned 24/7.

All you need is to connect the client program to your store's POS system. New data is then downloaded to your local PC, compiled and zipped up to the server via FTP. If for some reason, your Internet connection is stopped, data is stored locally so none is ever lost. Once our server receives the data, it's then processed and imported into your store's database and ready for quick viewing and easy editing.

SEAMLESS FUEL MANAGEMENT FOR THE ENTIRE ENTERPRISE.

StorePoint Web Office directly integrates oil company data, EDI suppliers and others into your back-office system. Fuel invoices, EFTS, credit card fees and fuel price notifications can be downloaded directly from oil company web sites. Fuel reconciliation and price monitoring have never been easier. Neither has the ability to manage your fuel operations chain-wide.

What's more, managers can view transaction data in real time. Live data allows you to monitor ongoing activity as it occurs including sales, returns and voids by cashier. Extensive reporting capabilities also help you create customized reports such as hourly sales, cashier summaries and customer charges.

With Retalix StorePoint Web Office, the industry's leading back-office system is just a click away.
